

*Experienced Worker Assessment Blueprint*

*Building Construction Occupations (Written Only)*

## Written Assessment:

Administration Time: 3 hours

Number of Questions: 200

### Areas Covered:

## Sample Questions:

A stairway has a total rise of 8 feet 9 inches. The mathematical measurements from the top of one thread to the top of the next, when laying out 14 risers, is \_\_\_\_\_ inches.

- A. 7.3
- B. 7.5
- C. 7.7
- D. 7.9

The accuracy of a straightedge should be checked by

- A. placing it against the edge of another straightedge
- B. drawing a line along one edge, rotate clockwise 180 degrees, and drawing a line parallel to the first line, using the same edge
- C. checking one edge against a plum-bob line
- D. matching one edge against an exposed edge of pre-trimmed wallpaper which has been hung on the wall

Which of the following is the weakest bond?

- A. stacked
- B. all stretcher
- C. flemish
- D. diagonal

A job requires a 120-volt primary, 6-volt secondary bell transformer to be installed. This transformer is accidentally connected to 120 volts on the secondary side which results in the primary side having

- A. 6 volts
- B. 120 volts
- C. 440 volts
- D. no voltage

The run and rise are **NOT** needed in

- A. laying out step horses
- B. determining the height of risers
- C. making a heel cut
- D. determining length of treads
